Compact Quad

Now you see it Now you don't!
Folding acoustic reflector

PPM, Phase & Peak indicators, De-embed & Bal Audio inputs.

Compact Quad, your solution for compact flexible and robust Audio Monitoring, providing instant selection between HD/SD and XLR Analogue sources. Mounted in a 1/2 rack 'WFM' Chassis, or used free-standing, four PPMs meter the selected Group, whilst LEDs continuously monitor for Ch1/2+3/4 PHASE & PEAK alarms.

Compact QUAD provides 8+8W stereo LS monitoring when free standing, quite surprising for equipment this size. Angled 'acoustic reflectors' direct sound to the Listeners; folding flat on the case for shipping and storage, a really neat feature much appreciated by those on 'Location Build-ups'. When rack mounted in Frame, the front speaker provides an 8W mono-mix, with independent L/R muting.

Compact Quad provides rear panel bal XLR OPs of selected Group, and balanced stereo OP of the volume control is provided for 'mission critical' monitoring. An equalised & reclocked HD/SD loop-put is provided, together with 16 channel audio level histogram in CVBS, for utility use elsewhere.

Outline Specification

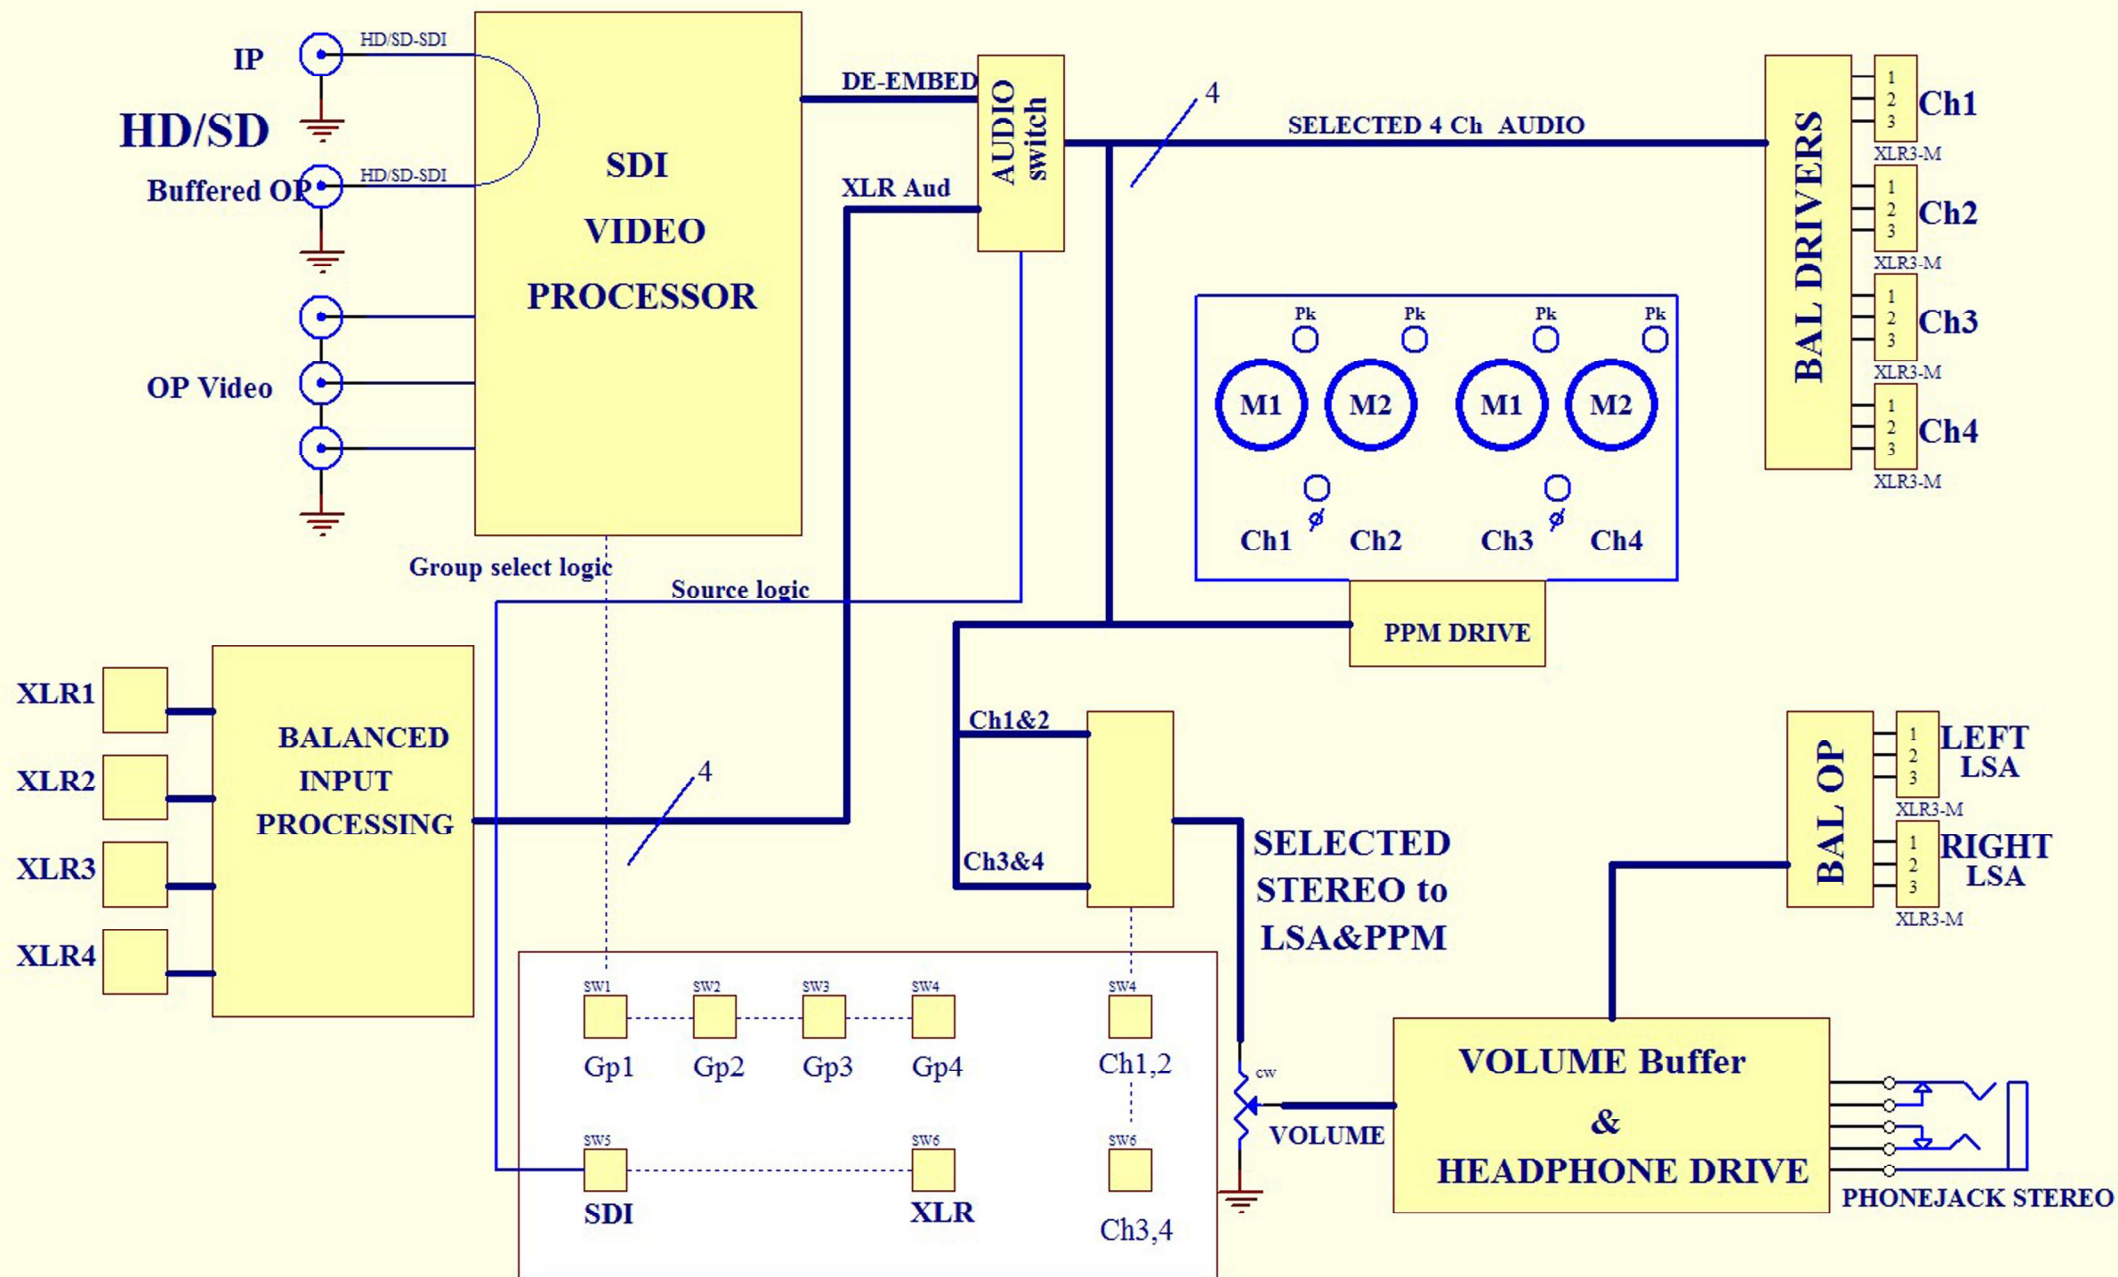

- * PPM with Phase & Pk indicators.
- * Selected Group 4CH Bal OP.
- * PPM, Nordic, Digital, VU scale.
- * Hinged acoustic reflectors
- * Free-stand or Rackmount,
- * Only 3U High, 270 mm deep.
- * '1/2 width WFM' compatible.
- * 8W Stereo LS amplifier
- * HP OP, with LS muting.
- * HD/SD IP, 4 Ch analogue IP.
- * Slip on 'sleeve' housing
- * Buffered Volume Control OP
- * All OP on XLR3 connectors
- * 10W 110~240V ac, IEC 320
